The Intelliseek Mission
Intelliseek mission is to add intelligence to the Internet. The Company is a leading provider of intelligent search, tracking and personalization infrastructure services to e-businesses.
Software infrastructure services add intelligence to portals. Intelligent portals understand their target audience and their specific requirements on an ongoing basis.
Intelliseek services include: integrated search services (news, database searching, shopping, metasearching, and vertical searching); personalization services (personalized content; adaptive user profiling) and tracking services (page & site tracking, topic tracking and customized tracking).
